Service Parts Remanufactured Exchange Catalog 01-E-1

REVISED 6/83

THIS CATALOG SECTION (PAGES 01-E-1 THRU 01-E-23)
SUPERSEDES CATALOG BOOKLET 01-E-1 1/79 (R 780)

The Tu-Flo 501 Compressor is an engine driven, two cylinder, reciprocating compressor with a displacement of 12 cu. ft. per min. at 1250 RPM.

It is available in an engine lubricated configuration and employs a water cooled cylinder head and air cooled block. It is available in belt drive, direct drive single flange and direct drive double flange mount configurations and features an Integral Block and Crankcase.

OPERATING LIMITATIONS: Maximum crankshaft speed - 3000 RPM
Maximum discharge temperature - 400°F.

FOR INSTALLATION AND MAINTENANCE INFORMATION SEE SERVICE DATA SD-01-3

EXCHANGE AND CHANGEOVER INFORMATION

TuFlo 501 Compressors are available with either an original equipment piece number or a remanufactured/exchange number. Common detail parts and dimensional information are illustrated in the compressor line drawings preceeding each catalog section.

Two reference schedules are listed for every O.E. piece number. One schedule displays both the O.E.M. number and the standard remanufactured exchange number, plus primary O.E. application and Bendix equivalent where applicable. O.E. piece numbers are also scheduled with configuration and accessory information.

Remanufactured/exchange compressors are illustrated by configuration and have a to/from changeover schedule with an application schedule.

NOTE: Detail Parts for Exchange Compressors (i.e. Crankcases, Crankshafts, Blocks, etc.) are not available as service parts. Exchange Compressors are not equipped with external parts or fittings.
